Professional Summary

- DevOps Engineer with 4 years of experience in CI/CD pipeline automation, Kubernetes/OpenShift platforms, RHEL administration, and Azure cloud operations in enterprise environments. Certified Kubernetes Administrator with strong automation skills using Terraform, Bash, and Python, focused on reliability, security, and high availability.

Technical Skills

CI/CD Tools:	Azure DevOps, Jenkins, GitHub Actions
Cloud Platforms:	Azure (VMs, Blob, SQL, Monitor)
Containerization:	Docker, Kubernetes, Red Hat OpenShift, Helm, AKS
IaC & Automation:	Terraform, ARM Templates, Bash, Python
Monitoring:	Prometheus, Grafana
Operating Systems:	RHEL, Ubuntu

Certifications

- **AZ-400: DevOps Engineer Expert** - *Microsoft* — 2026
- **Certified Kubernetes Administrator (CKA)** - *Cloud Native Computing Foundation* — 2024
- **AZ-104: Microsoft Azure Administrator** *Microsoft* — 2025
- **AZ-900: Azure Fundamentals** *Microsoft* — 2023

Professional Experience

Royal Cyber Inc — Software Engineer (DevOps)

Jul 2024 –
Mar 2026

- Designed, deployed, administered, and upgraded enterprise Red Hat OpenShift 4.16 clusters (50+ nodes), managing cluster lifecycle, capacity planning, platform hardening, and production reliability.
- Managed Kubernetes/OpenShift platform components including namespaces, RBAC, service accounts, resource quotas, storage classes, persistent volumes (PV/PVC), networking, ingress, and application workloads.
- Implemented security and compliance controls using Security Context Constraints (SCCs), NetworkPolicies, image security policies, and audit logging to meet enterprise governance requirements.
- Troubleshoot complex OpenShift platform, Kubernetes, container, networking, storage, and application issues using Prometheus, Grafana, OpenShift Monitoring, and centralized logging, minimizing production downtime and improving platform stability.
- Executed backup and disaster recovery procedures using etcd snapshots, validating cluster recovery, application availability, and business continuity during maintenance activities.
- Administered LinuxONE and Red Hat Enterprise Linux (RHEL) systems, performing provisioning, patching, OS hardening, while managing KVM virtual machines, IBM LPAR resources, storage (LVM, NFS, SAN), and network configurations supporting OpenShift platform operations.
- Led critical incident resolution, performed Root Cause Analysis (RCA), and implemented preventive measures to improve platform reliability and reduce recurring production issues.

- Provided day-to-day operational support for enterprise Azure environments, handling alerts, incidents, and service requests across compute, storage, networking, and container platforms.
- Supported Azure Kubernetes Service (AKS) clusters by monitoring workloads, analyzing pod scheduling issues, node pressure, and resource utilization, and performing node pool scaling under change management processes.
- Monitored Azure resources using Azure Monitor and Log Analytics, investigated alerts, performed initial triage, and escalated incidents with detailed diagnostics, contributing to faster MTTR.
- Provisioned, maintained, and troubleshooted Azure Virtual Machines, Blob Storage, and Azure SQL Databases, following organizational security and compliance standards (NSGs, RBAC, access controls).
- Assisted in configuring and validating Azure Backup and Azure Site Recovery, supported DR drills, and ensured backup policies compliance.
- Worked in a ticket-driven environment, meeting SLA commitments, coordinating with cross-functional teams, and supporting business-critical applications.

Education

Master of Science in Computer Applications

2021 – 2023

Modern College, Pune

Bachelor of Computer Applications

2018 – 2021

Modern College, Pune
